- Chris Kobbe, Columbia Gas Construction Leader, 412.250.0700, ckobbe@nisource.com
- Lee Gierczynski, Columbia Gas Communications, 724.416.6015, lgierczynski@nisource.com

## WHAT YOU CAN EXPECT

To ensure the continued safe delivery of reliable and natural gas to our customers, Columbia Gas will be undertaking several pipeline replacement projects in Beaver Borough in 2020. These projects may include replacing your service line and moving any indoor gas meters outside at no additional cost to you. This will occur after the upgraded main pipeline has been installed in your neighborhood.

Temporary road and parking restrictions are possible during working hours. Temporary parking restrictions will be marked with signage in advance. We regret any problems this may cause and will make every effort to limit traffic restrictions or delays.

To transfer service from the old gas pipeline to the upgraded pipeline, your gas service will be temporarily interrupted for several hours. A Columbia Gas employee or contractor will notify you in person or with a door hanger at least three days before your gas service is interrupted.

After the customer's service is transferred to the new pipe, a Columbia Gas representative or contractor will need access to your home to restore your gas service and perform safety

checks. We perform safety checks both inside and outside the residence on appliances and house piping. If a concern is discovered inside during a natural gas safety check, an appliance or house line may be "red tagged" and the customer is responsible for repairing it.

All project workers have photo ID badges identifying them as Columbia Gas employees or contractors. Please ask for ID before allowing anyone into your home.

You may call us at 1-888-460-4332 for Columbia Gas employee verification. If we can't reach you in person, a tag will be left on your door with information on how to schedule a time when we can switch your service.

## PROPERTY RESTORATION

Please know we will fully restore any yards, landscaping, driveways, and sidewalks to municipality standards.

We wish to limit the inconvenience to you and your neighborhood and urge you to contact us with any questions or concerns.

### WORK ZONE SAFETY

Please follow these tips to keep you and our crews safe when traveling through a work zone.

- Please slow down and use caution when approaching work zones.
- Please obey all posted signs and traffic control flaggers.

Thank you for your patience and cooperation!
